

# Book Page Photo Display

## Supplies Needed:

- Canvas
- Book pages (approx. 6)
- 6 feet of twine
- Mini clothespins
- Paint brush
- Mod Podge (see box)
- Tape or glue

## Step 1: Rip up pages at random!

Save money by making an easy homemade Mod Podge that's a simple mixture of equal parts school glue and water.

**Step 2: Apply Mod Podge to a section of canvas, including sides, and lay torn pieces on top to cover canvas. It may be easiest to cover edges first, then work inward to completely cover. Smooth out any bubbles before Mod Podge dries. Pieces can overlap as needed.**

**Step 3:** Apply a thin layer of Mod Podge over the entire canvas covering book pages and including edges to seal it. Allow to dry completely.

**Step 4:** Anchor one end of twine on the back side of the canvas with tape or glue. Wrap the remaining length around the canvas, crossing at random. Secure the other end on the back and trim any excess. Add clothespins to hold a photo or simply tuck the photo behind twine. The twine wrap should allow for vertical or horizontal orientation of photos by moving clothespin as needed.
